SUMMARY

I design and build digital products, owning the process end to end. 2+ years as a Designer and Developer. I research root causes and turn fuzzy problems into working solutions. I use AI tools (Claude, Cursor) daily as part of my workflow. I am a clear communicator and comfortable working with cross-functional teams. Completing my MSc thesis in Usability Engineering, focused on Human-Centered Design.

EXPERIENCE

Design Engineer | Fressnapf Holding SE | Krefeld, Germany

Aug 2024 to Present

Shipped 4 tools end to end: 3 live customer products and 1 internal platform used by all employees.

Order Automation Tool (Internal, company-wide, solo build): Spotted friction in manual order processing. Did a survey with the internal QA testing team, defined scope, designed in Figma, and built in React and Python-Flask. Integrated REST APIs and created a dedicated database. Did A/B testing and maintenance after release. Technical documentation in Jira.

PetBot (Live customer-facing app): Designed and built the frontend for an AI chatbot. Refined the UI in React to handle 300+ test scenarios. Caught edge cases early. Created, tested, and iterated system prompts to get desired responses from the AI model.

Sophie (Live AI review-response tool): Designed and built an AI feature where LLM-generated responses pass through human editorial review. Reused standard design system components to ensure consistency across the product. Designed the workflow so AI handles the draft and humans keep control. Worked in alignment with DevOps.

CUCA (Live customer review dashboard): Noticed users were overwhelmed by two separate screens. Combined them into one dashboard. Reduced clicks and cognitive load without losing data depth. Pitched the idea to leadership and got it shipped.

AINEXUS-39 Versioning Research: Authored a technical research document evaluating GitHub versioning strategy across 1,500+ commits for the ai-nexus and petbot repositories. Defined branch naming conventions and cross-repo compatibility matrix.

Led stakeholder sessions producing roadmaps and UI concepts, ensuring 100% alignment between business goals and shipped code. Use Claude Code and Cursor daily to prototype fast and ship faster.

Freelance Designer and Developer | Remote

2023 to Present

Built multiple digital products from concept to launch for independent creators and entrepreneurs. Keeping documentation in Notion. Using Figma and Framer for design drafts. Developed using React, TypeScript, and JavaScript.

Tracking what matters: engagement, sign-ups, conversion funnels via GA4 and Microsoft Clarity. Making product decisions from data.

Quality Assurance Engineer | Crest Data Systems | Ahmedabad, India

Jan 2022 to Feb 2024

Built an automated testing framework using Selenium, accelerating release velocity by 25%. Validated enterprise integrations for Google Chronicle and Jira, ensuring 98% adherence to security requirements. Drove Agile sprints and maintained documentation in Confluence.

Streamlined defect lifecycles in Jira and performed backend validation using Postman and MongoDB, ensuring data integrity across distributed platforms.

EDUCATION

MSc in Usability Engineering (HCI focus), Hochschule Rhein-Waal | Apr 2024 to Aug 2026 | Kamp-Lintfort, Germany

BTech in Computer Engineering, Marwadi University | Jan 2018 to Apr 2022 | Rajkot, India

SKILLS

Design: Figma, Framer, Miro, Adobe CC, UI Design, UX Research, Usability Testing, Wireframing, User Flows, Design Systems, Responsive Design, CRO, A/B Testing, Onboarding Design, Growth Design, Content Design, Accessibility (WCAG)

Engineering: React, HTML5, CSS3, JavaScript, TypeScript, Python, Flask, Git, REST APIs, Postman, MongoDB, Visual Studio, GitHub

AI and Workflow: Claude, Cursor, Midjourney, Relume.io, AI Agents, Vibe Coding

Analytics and Collaboration: Google Analytics 4, Microsoft Clarity, Monday.com, Jira, Confluence, Agile/Scrum, Stakeholder Management, Notion

CERTIFICATIONS

Jira and Confluence Fundamentals (Atlassian) | Digital Marketing Fundamentals (Google) | Selenium WebDriver with Python and Java (Udemy) | Innovation and Emerging Tech (Coursera)

LANGUAGES

English: Proficient (C1/C2) | German: Elementary | Hindi: Native
